

TABLE OF CONTENTS

CHAPTER 1 – CONSTRUCT A LOOM	1
Data sensemaking—the ability to weave data into understanding—requires a spectrum of skills. Critical thinking and scientific thinking are foremost among them.	
CHAPTER 2 – THINK CRITICALLY	13
When we think critically, we apply logic and avoid cognitive biases.	
CHAPTER 3 – THINK SCIENTIFICALLY	47
When we think scientifically, we apply the scientific method.	
CHAPTER 4 – QUESTION THE DATA	67
Thinking critically and scientifically leads us to ask essential questions about data to improve the reliability of our findings.	
CHAPTER 5 – MEASURE WISELY	83
Metrics can be powerful, but we often measure the wrong things, measure the right things ineffectively, and use measurements in harmful ways.	
CHAPTER 6 – DEVELOP GOOD THINKING HABITS	103
In addition to critical thinking and scientific thinking, data sensemaking is also enriched by developing good thinking habits.	
CHAPTER 7 – DEVELOP A DATA-SENSEMAKING CULTURE	111
Effective data sensemaking is undermined by most organizational cultures. We must promote the cultural changes that are needed to embrace critical and scientific thinking with data.	
EPILOGUE – EMBRACE THE OPPORTUNITY	121
